

Making the move from...

PDF Portal Payslips

Many businesses have already made the switch to PDF payslips in a secure online portal. Often the easiest option is to utilise payslip functionality in your existing HR system, or the default solution provided by your payroll software.

It is worth considering whether your online payslip portal is really fit for purpose for your business, or whether there are better options out there for your needs.

Why companies choose to change their payslip portal

- They need staff to access payslips without accessing work systems
- Their payroll team spend too much time administering their current online payslip tool
- There are usability issues with their current solution, such as problems with password resets
- They want a more innovative solution that adds value for their employees

4 common problems with payslip portals...

LEAVERS

If employees access payslips via an HR system, their access must be removed when they leave - meaning they must download PDF copies before leaving to retain a record of their payslips.

FUNCTIONALITY

The payslip module has been built as a bolt-on to the HR functionality, rather than being designed as a key output. The payslips are often just PDF copies attached as a download.

ACCESS

If the portal can only be accessed via a work network the employee can't access their payslip when they are on leave. This causes further problems for staff working remotely, on long term sickness OR maternity leave.

COST

Purchasing a license for staff to an entire HR system when they only need to use the payslips module can be prohibitively expensive.

There is a better payslip portal solution.

THE PAYDASHBOARD SOLUTION

Problems delivering payslips to staff on maternity leave, or those who have ceased employment?

Because PayDashboard is an independent bolt-on to your other systems, staff can access their payslips without have to log in to a work system or their work emails - even after their employment has ended. Our optional Single Sign-On (SSO) feature allows you to link PayDashboard to your HR system or intranet for ease of access to staff who are using these systems - allowing them to move between platforms quickly and easily.

Spending too much time administering your online payslips?

PayDashboard is a purpose-built payslip portal for high-volume payslip delivery. We've created features to automate and streamline your payslip delivery processes. Whether its uploading data in advance and scheduling the publication date, or automated matching of PAYE forms to employees, your payroll team will find payroll week a breeze with PayDashboard in place.

FEATURES TO HELP YOU GO FROM PDF PAYSLIPS TO SMARTSLIPS™

- ✓ One portal for all payslips, PAYE forms and documents
- ✓ Single sign-on (SSO) to PayDashboard from your HR system
- ✓ Customise PayDashboard with your logo and colours
- ✓ Engaging tools to help employees understand their payslip
- ✓ Fully responsive site – works on desktop, tablet and mobile

Pay Dashboard Limited is registered in England and Wales with registered number 08853884 and registered office located at 4th Floor, 86-90 Paul Street, London, EC2A 4NE.

Employees struggling to use your current system?

We consulted some of the best user experience (UX) designers in the UK to ensure PayDashboard is simple and intuitive to use. The entire site is mobile responsive and will auto-translate to whatever language your employee chooses. With our comprehensive online help centre and email support from our UK team – you won't find a better portal than PayDashboard when it comes to supporting your employees to switch to online payslips.

Think payslips should be more than just a PDF?

So do we! We deliver added value every payday with our SmartSlip™ technology. Through graphical dashboards, payslip comparison tools and financial education – we'll help your employees to better understand their pay and so reduce the number of pay-related queries received by your HR team in the process.
